github.com/nattapong2548

Computer Engineering & IoT undergraduate with hands-on full-stack development experience using TypeScript, Next.js, and PostgreSQL. Built deployed applications with authentication, receipt processing, and reporting; GPA 3.58/4.00.

EDUCATION

Rajamangala University of Technology Krungthep, Thailand

B.Eng. in Computer Engineering & IoT

Expected Graduation: 2028 | GPA: 3.58/4.00

Coursework: Computer Architecture, Software Engineering, IoT / Embedded Systems, Programming, Digital Image Processing

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Web: Next.js, React, Node.js, Tailwind CSS, shadcn/ui, Framer Motion

Backend: MySQL, PostgreSQL, Supabase, REST APIs, Authentication, RLS

Tools: Git, GitHub, VS Code, Vercel | AI: OCR, AI-assisted Development

PROJECTS

My Payment Pro — Full-Stack Expense Management

Next.js | TypeScript | Supabase | PostgreSQL | shadcn/ui | Vercel

- Built expense recording, categorization, reporting, and dashboard components using Next.js and TypeScript.
- Designed a PostgreSQL database and implemented Supabase authentication, receipt image uploads, and file storage.
- Integrated OCR to extract receipt information and suggest expense categories.
- Managed source code with Git/GitHub and deployed the application on Vercel.

E-commerce Web Application — Team Project | MySQL

- Contributed to backend development and MySQL database work for a team-built e-commerce website.
- Designed web page layouts while teammates implemented other components.

Drone-Based Inventory Inspection — Academic Proposal

- Serving as project manager in a four-member Project Management course team.
- Preparing the project proposal, documentation, and proposed approach for presentation.
- Proposal stage; system implementation has not started.

ADDITIONAL EXPERIENCE

AI Content Creator / Project Owner — Mee Rai Ja Bok

- Managed end-to-end content ideation, AI-assisted video production, and publishing for an educational page with approximately 52K followers.
- Analyzed content performance to refine topics, formats, and posting strategy with the goal of increasing audience reach.
- Researched market trends and consumer demand to identify potential products to sell and inform content planning.
